

MY BODY AND SAFETY

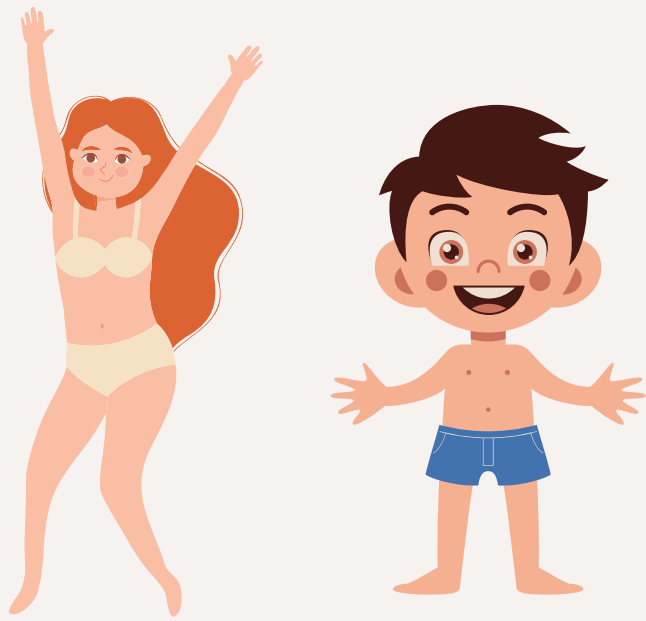

© *Dariia Orlova-Zhernovaya*

Everyone has
their own
intimate places

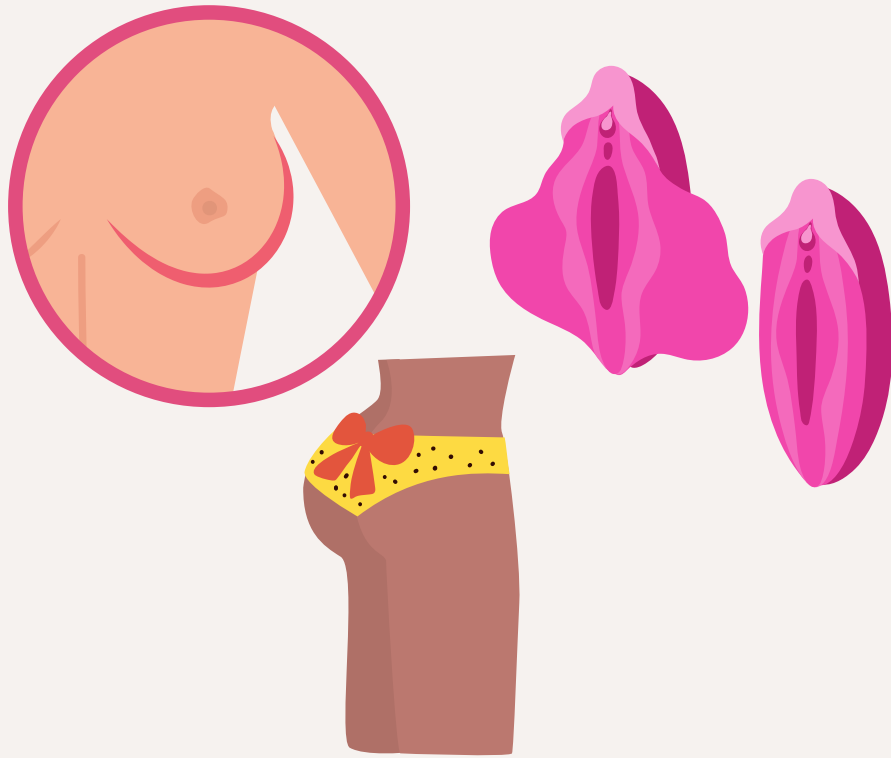

Such places are
for adults and
children, for girls
and boys

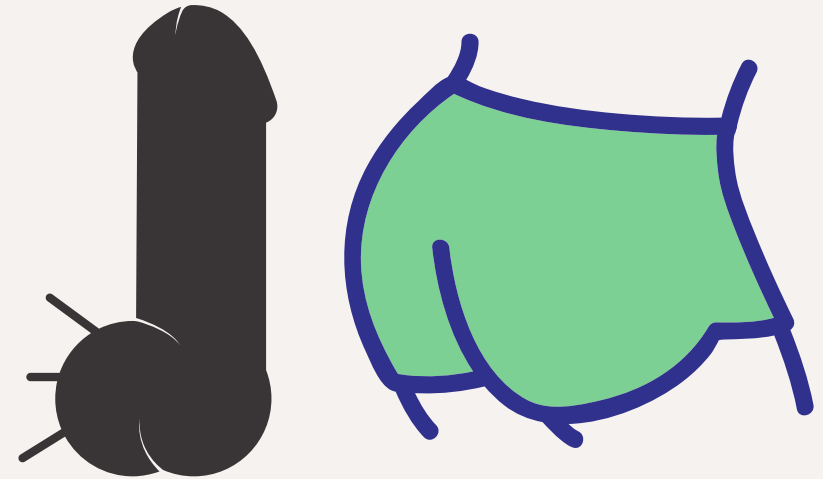

Intimate places
are hidden under
panties and a T-
shirt or bra

In summer we hide
intimate places under a
swimsuit or swimming
trunks

The intimate places
for girls are the
breasts, vulva and
butt

The intimate
places for boys
are the butt and
the penis

No one can touch
your intimate places
except your parents
or the doctor

No one can force you
to touch intimate
places of other people

No one can
demand to show
your intimate
places

No one can force
you to look at
her/his intimate
places

No one can
photograph your
intimate places

No one can spy on
you in the toilet,
shower or while
changing of clothes

There is a safe touch: a handshake, hugs with loved ones, touch to the shoulders or arms

There is a dangerous touch: when touching intimate places or making hurt

If you are scared or uncomfortable - do not be silent: shout or make noise

You always can say "stop out" loud or call for help from adults

Whatever happens, you need to tell your mother or another adult

They will help and protect you from bad people. Do not be afraid, because the offender is always guilty. Take care of yourself!
